WHAT WORKS

- **Fresh, on-brand homepage merchandising.** The four hero slides were produced within the last three weeks (files dated Sep 9–23, 2026), all four link to live pages, the carousel is ARIA-labelled, and the Women / Men / Heavyweight / Vintage Washed tiles carry descriptive alt text.
- **Unusually deep product data and imagery.** Style 5051 ships 28 colors × 9 sizes (XS–5X) with 107 alt-view images and specific alts (“Unisex Short Sleeve Tee BLACK Back”); the 19 live sampled PDPs average about 73 words of real spec copy. Product URLs are self-healing — /product/5051/anything.html, /product/5051/ and the CGI form all 301 to the canonical slug.
- **Clear wholesale terms and a search that respects style numbers.** Prices are public; /shipping states the rule precisely (free freight at \$350 per warehouse, \$9.95 handling, in-stock only, updated Oct 30, 2025); customer service lists phone, address, hours and the RA returns process. Searching “5051” returns the style in position 1.

WORKING FIXES ON THE PAGE

- One homepage, one hostname
- Sitemap, regenerated
- One Product, one truth
- dataLayer linter
- A crawlable category grid

FIRST 30 DAYS

- Hostname and homepage redirects, canonical tag in the layout template
- Regenerated sitemap from the catalog; 404/410 for retired styles
- GA4 payload fixes verified in DebugView; data-quality tile on the dashboard

SIX FINDINGS, WITH COUNTS

The homepage is a meta-refresh stub; four hostnames answer 200 and no page carries a canonical

4 of 4 host/protocol variants return 200 · 0 of 24 HTML pages with a canonical · lowercase /category/men/ also 200

The sitemap is 38% redirects, lists checkout and login pages, and serves dead products as 200

408 of 1,063 URLs are redirecting CGI category links · 16 cart/login/checkout pages · 0 of 248 product URLs with lastmod · 3 of 20 sampled products dead or obsolete but 200

Product schema is split in two, blank on availability, and carries the same 5★ / 326-review rating on every product

19 of 19 PDPs with two Product blocks · 19 of 19 with Offer.availability "" · 19 of 19 identical aggregateRating 5 / 326 · 0 of 20 BreadcrumbList, og:image, GTIN or MPN · 150 of 150 color hexes set to FFFFFFFF

GA4 receives products without names, views without currency and no list attribution

21 of 21 category impressions with blank item_name and item_brand · 20 of 20 view_item pushes without currency or brand · page-level push array-wrapped on every template · 0 view_item_list or select_item events anywhere

Category grid: 21 of 136 Men's products in the HTML, \$0.00 tiles, “New” on everything, Men = Unisex

21 of 136 products (15%) present in HTML · 3 of 21 tiles at \$0.00 · 21 of 21 flagged new · position 1 is an imported tee · Men (136) = Unisex (136) · 90 of 359 images without alt

Size charts are images labelled “Pick your color”, no product video, a News page with no news, a footer link that 404s sitewide

18 chart images, 0 tables · 13 of 15 chart alts read “Pick your color” · 0 of 19 PDPs with video · 0 dated posts on /in-the-news · 1 footer link → 404 on every page · 38 of 38 image filenames are timestamps
